EDUCATION AND COURSES

Southern New Hampshire University

Bachelor's of Science in Computer Science

New Hampshire, MH

Expected 2026

The Odin Project

Full Stack Developer Curriculum

Remote

Aug. 2023 – Dec. 2023

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, C++, Java, HTML/CSS, Rust

Frameworks: React, React Native, Next JS, Redux, Tailwind CSS, Node.js, Fast API, Docker, AWS

Developer Tools: Git, VS Code

RELEVANT WORK EXPERIENCE

Software Engineering Intern

Datadog

Jan 2025 - April 2025

New York, NY

- Contributing to a company-wide initiative to standardize query-building experiences across all Datadog products.
- Migrating and refactoring existing query editor code to align with a shared framework, improving consistency, maintainability, and developer experience.

Software Development Engineer Intern

Amazon Web Services

June 2024 - August 2024

Seattle, WA

- In addition to introducing a new Archiving and Unarchiving feature to Amazon ECR, I implemented an API to introduce new database changes to manage the complex process of changing docker image states internally.
- Improving system reliability and performance, contributing to cost savings and operational efficiency for major clients like Stripe and Salesforce.
- Participating in Agile development practices, including sprint planning, stand-ups, and retrospectives, to deliver high-quality features on time.

Freelance Web Developer

Various Clients

Jan 2023 - Present

Remote

- Developed and delivered full-stack websites using TypeScript, Next.js, React, and Tailwind CSS, resulting in dynamic, responsive, and visually appealing user interfaces.
- Utilized Postgres for efficient database management, ensuring seamless data storage, retrieval, and querying functionalities.
- Collaborated closely with clients, translating their requirements into technical specifications, managing project timelines, and delivering tailored solutions that met their needs.

PROJECTS

Daring Connections | *React, Typescript, Nextjs, WebSockets, WebRTC, Redis, Firebase, SQL* DaringConnections

- Daring Connections is a live streaming platform that facilitates live streaming, one-on-one spontaneous video connections, and social media interactions
- Utilized Web Sockets for real-time communication, leveraging Live-Kit technology for reliable video connections.
- Implemented a robust user information storage system using SQL cloud database at Daring Connections, complemented by secure authentication through Firebase.

Priority Hub | *ReactJs, NextJs, JavaScript/TypeScript, Tailwind CSS, Firebase, Material UI*

Priority Hub

- Priority Hub is a web-based, kanban-style application.
- It's UI enables for easy drag and drop functionality allowing for effective organization and progress tracking.
- Experience the power of seamless data management and secure authentication. Utilizing Firebase, this app ensures your information is organized, synchronized, and protected.

Timeblend | *ReactJs, NextJs, JavaScript/TypeScript, Chakra Ui, Firebase*

Timeblend

- TimeBlend is a modern scheduling tool designed to streamline the process of finding the optimal communal time to meet.
- Designed an intuitive and user-friendly interface that enabled users to schedule meetings and coordinate availability across multiple participants effortlessly. Implemented robust algorithms to intelligently analyze participants' calendars and identify overlapping free time slots, simplifying the process of finding mutually convenient meeting times.
